Astana, Kazakhstan (UTC+5)
Languages: Russian - Native, English - B2

Frontend Developer with commercial experience at Purrweb, specializing in React and TypeScript, with strong experience in React Native and Expo. I build modern, responsive web applications and cross-platform mobile applications, focusing on clean architecture, reusable components and practical product solutions. My frontend experience includes React, Next.js, TypeScript, Redux Toolkit, TanStack Query, Zustand and GraphQL. I also have strong hands-on experience with React Native and Expo, including authentication, user flows, integrations, maps, geolocation, offline persistence and mobile UI. My personal projects include full-stack web applications built with Next.js, React, TypeScript, Supabase and PostgreSQL, as well as a cross-platform mobile travel application.

Currently based in Almaty, Kazakhstan and open to Frontend, React and React Native opportunities. Also open to remote work and relocation.

Key Competencies

- Web application development with React, Next.js, and React Admin.
- Mobile application development with React Native and Expo.
- Implementation of registration, authentication, and user flows.
- Integration of maps, geolocation, and background tasks.
- Working with GraphQL, Apollo Client, RTK Query, and TanStack Query.
- Designing application structure and frontend-backend interaction.
- Working with Supabase, PostgreSQL, and SQL.
- Optimizing interfaces and dynamic lists.
- Using Git in team-based development.

- Understanding of algorithms, data structures, and software design principles.

Tech Stack

- *Languages*: JavaScript, TypeScript, SQL, Java
- *Frontend*: React, Next.js, React Admin
- *Mobile*: React Native, Expo, Expo Router
- *State Management* / *Data*: Redux, Redux Toolkit, RTK Query, Zustand, TanStack Query, GraphQL, Apollo Client
- *Forms* / *Validation*: React Hook Form, Zod, Yup
- *Maps* / *APIs*: React Native Maps, Expo Location, Expo Background Fetch
- *UI* / *Animation*: React Native Reanimated, Gesture Handler, SVG, Shopify FlashList, Draggable FlatList
- *Backend* / *DB* / *Auth*: Supabase, PostgreSQL, Supabase Realtime, Supabase Auth, Expo Secure Store
- *Tools*: Git, Node.js, Webpack, Vite, Maven, Nginx, Docker, Linux, EAS CLI
- *Testing*: Vitest, JUnit 5, Mockito

Education:

2018 - 2022
Omsk State Technical University (Russia, Omsk)
Faculty of Information Technology and Computer Systems (FITICS),
Fundamental Informatics and Information Technology.
Incomplete higher education.

Work experience:

React Native Developer - Purrweb (April 2026 - June 2026)	Developed mobile application features using React Native and Expo: authentication, rental flow, maps/geolocation, forms, localization and client-side integration with backend services. Gozap Mobile — Power Bank Rental App ● Implemented authentication via Google Sign-In and Apple Authentication, including secure token storage with Expo Secure Store. ● Developed the core power bank rental user flow: station discovery, rental initiation, active rental state and return flow. ● Integrated maps and geolocation features to help users locate nearby power bank stations.

- Built and validated forms using React Hook Form and Zod.
- Implemented localization using i18next and Expo Localization.
- Managed server state with TanStack Query and client state with Zustand.
- Improved UI interactions using React Native Reanimated and Gesture Handler.

Tech Stack: TypeScript, React Native, Expo, Zustand, TanStack Query, React Native Maps, Expo Location, React Native Reanimated, Gesture Handler, SVG, React Hook Form, Zod, Expo Secure Store, i18next, Expo Localization, Google Sign-In, Apple Authentication.

React Native Developer Intern - Purrweb
(October 2025 - December 2025)

Mobile Social Network — Internship Project

- Implemented user registration, post creation, editing and commenting flows.
- Built data layer with GraphQL, Apollo Client and Apollo Cache to synchronize UI state.
- Used RxJS for reactive handling of asynchronous streams and cache-related updates.
- Optimized feed rendering with Shopify FlashList, reducing unnecessary re-renders and improving scrolling performance.
- Configured CI/CD pipeline with EAS Build for development, preview and production builds.

Tech Stack: TypeScript, React Native, Expo, GraphQL, Apollo Client, RxJS, Expo Router, React Native Reanimated, Gesture Handler, SVG, Shopify FlashList, BootSplash, Safe Area Context, Expo Image Picker, Expo Clipboard, React Hook Form, Expo Secure Store, EAS CLI.

Frontend Developer Intern - Purrweb
(August 2025 - October 2025)

Developed several web projects.

- Social Network
  - Implemented user flow for registration, publishing, and commenting on posts.
  - Worked with Apollo Client and GraphQL.
- Admin Panel
  - Developed the admin interface using React Admin.
  - Used React Avatar Editor and React Hook Form.
- News Portal

- Implemented the news feed, filtering, favorites, and comments.
- Worked with RTK Query, Next.js, and OpenAPI.

Tech Stack: TypeScript, React, GraphQL, Apollo Client, React Admin, React Hook Form, RTK Query, Next.js, OpenAPI.

Academic Project - 7bits (November 2024 - June 2025)

Developed a web application for conducting online quizzes with the ability to register users, create rooms, and host game sessions.

- Designed the application architecture.
- Configured the frontend and backend interactions.
- Configured the server and database.
- Implemented user registration and authorization.
- Implemented the quiz game logic and the single-player interface.
- Provided at least 90% unit test coverage.

Frontend tech stack: JavaScript, TypeScript, React, Redux Toolkit, HTML, CSS, Webpack, Node.js, npm, Vitest.

Backend tech stack: Java, Spring Framework, PostgreSQL, Nginx, Maven, JUnit 5, Mockito.

Solo projects

TaskFlow - Project and Task Management System (https://github.com/YuliaVorotintseva/taskflow)

- Developed a task management application for organizing projects, tasks and statuses.
- Implemented authentication, task creation, editing, filtering and project views.
- *Stack*: React 19, Next.js 15, TypeScript, Tailwind CSS, TanStack Query, PostgreSQL, Drizzle ORM, Docker, Docker Compose.

Finance Tracker - Application for thorough financial accounting (https://github.com/YuliaVorotintseva/finance_tracker)

- Built an application for tracking income, expenses and categories.
- Implemented charts, filters, forms and persistent storage.
- *Stack*: Turborepo, React 19, Next.js 15, TypeScript, TanStack Query, NestJS 10, PostgreSQL, Drizzle ORM, Docker, Docker Compose.

TravelTracker - Collaborative trip planner (https://github.com/YuliaVorotintseva/travel_tracker_mobile)

- Developed a mobile app for planning trips and managing travel routes.

- Implemented maps, geolocation, collaborative trip features and offline-related logic.
- *Stack*: React Native, Expo SDK, Supabase, NetInfo, Expo Location, Deep Linking, Clipboard, System UI.

Ready for the next step

Thank you for taking the time to review my CV. I'm open to discussions about React Native and Frontend Developer / Engineer positions. My focus is type safety, performance, and clean architecture, which directly impact the user experience.

Preferred location: Astana / Kazakhstan. I'm available for remote work or relocation. I'd be happy to discuss how my experience could benefit your team.
